MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 57 (1991)

Absorption, endotoxin, elimination, mortality, 145
Adiposity, training, detraining, cardiac hypertrophy, 49
Adrenal medulla, sympathetic ganglion, Down's syndrome, mouse, trisomy 16, catecholamines, 101
Ageing, arterial smooth muscle proliferation, atherosclerosis, hypothalamic stimulation, 205
Age at death, arteriosclerosis, 139
Age pigment, leupeptin, ceroid-lipofuscin, protease inhibitor model, rat liver, 213
Aging, alcoholism, cellular immunity, 175
Aging, cultured vascular smooth muscle, cultured adventitial fibroblast, cAMP, beta adrenergic receptors, isoproterenol, forskolin, 259
Aging, DNA repair, neurons, lymphocytes, 283
Aging, erythrocytes, membrane proteins, oxidation, methionine sulphoxide, thiol groups, 247
Aging, food restriction, glycation, collagen, 163
Aging, growth hormone, life span, immune response, longevity, immunologic theory of aging, 87
Aging, intracisternal A-particle, gene expression, retrovirus-like elements, development, mouse tissues, 71
Aging, ischemic heart disease, coronary artery disease, mortality, epidemiology, 1
Aging, mitochondria, lipid peroxidation, thioctacid, α-lipoic acid, 233
Aging, oxygen free radicals, oxidative stress, mitochondrial damage, 187
Aging, retinoblastoma, anti-oncogene, transcription, human diploid fibroblast, senescence, 63
Aging (rat uterus), physico-chemical properties, nuclear estrogen receptor, 111
Alcoholism, aging, cellular immunity, 175
Anti-oncogene, retinoblastoma, transcription, human diploid fibroblast, senescence, aging, 63
Arterial smooth muscle proliferation, ageing, atherosclerosis, hypothalamic stimulation, 205
Arteriosclerosis, age at death, 139
Atherosclerosis, arterial smooth muscle proliferation, ageing, hypothalamic stimulation, 205
Beta adrenergic receptors, cultured vascular smooth muscle, cultured adventitial fibroblast, aging, cAMP, isoproterenol, forskolin, 259
Bone, pigeon, rat, tendon, mechanical properties, collagen, elastin, 15

CAMP, cultured vascular smooth muscle, cultured adventitial fibroblast, aging, beta adrenergic receptors, isoproterenol, forskolin, 259
Cardiac hypertrophy, training, detraining, adiposity, 49
Catecholamines, sympathetic ganglion, adrenal medulla, Down's syndrome, mouse, trisomy 16, 101
Cellular immunity, aging, alcoholism, 175
Ceroid-lipofuscin, leupeptin, age pigment, protease inhibitor model, rat liver, 213
Chromosome aberrations, trimethyltin chloride, lymphocytes, 125
Collagen, food restriction, glycation, aging, 163
Collagen, pigeon, rat, bone, tendon, mechanical properties, elastin, 15
Comparative epidemiology, Gompertz function, mortality, life span, 25
Coronary artery disease, ischemic heart disease, aging, mortality, epidemiology, 1
Cultured adventitial fibroblast, cultured vascular smooth muscle, aging, cAMP, beta adrenergic receptors, isoproterenol, forskolin, 259
Cultured vascular smooth muscle, cultured adventitial fibroblast, aging, cAMP, beta adrenergic receptors, isoproterenol, forskolin, 259
Cytophotometric, gallocyanin, RNA content, dorsal lateral geniculate nucleus, 275

Detraining, training, cardiac hypertrophy, adiposity, 49
Development, intracisternal A-particle, gene expression, retrovirus-like elements, aging, mouse tissues, 71
DNA repair, aging, neurons, lymphocytes, 283
Dorsal lateral geniculate nucleus, gallocyanin, cytophotometric, RNA content, 275

Down's syndrome, sympathetic ganglion, adrenal medulla, mouse, trisomy 16, catecholamines, 101
Elastin, pigeon, rat, bone, tendon, mechanical properties, collagen, 15
Elimination, endotoxin, absorption, mortality, 145
Endotoxin, absorption, elimination, mortality, 145
Epidemiology, ischemic heart disease, coronary artery disease, aging, mortality, 1
Erythrocytes, aging, membrane proteins, oxidation, methionine sulphoxide, thiol groups, 247

Food restriction, glycation, collagen, aging, 163
Forskolin, cultured vascular smooth muscle, cultured adventitial fibroblast, aging, cAMP, beta adrenergic receptors, isoproterenol, 259

Gallocyanin, cytophotometric, RNA content, dorsal lateral geniculate nucleus, 275
Gene expression, intracisternal A-particle, retrovirus-like elements, aging, development, mouse tissues, 71
Glycation, food restriction, collagen, aging, 163
Gompertz function, mortality, comparative epidemiology, life span, 25
Growth hormone, life span, aging, immune response, longevity, immunologic theory of aging, 87

Human diploid fibroblast, retinoblastoma, anti-oncogene, transcription, senescence, aging, 63
Hypothalamic stimulation, arterial smooth muscle proliferation, ageing, atherosclerosis, 205

Immune response, growth hormone, life span, aging, longevity, immunologic theory of aging, 87
Immunologic theory of aging, growth hormone, life span, aging, immune response, longevity, 87
Intracisternal A-particle, gene expression, retrovirus-like elements, aging, development, mouse tissues, 71
Ischemic heart disease, coronary artery disease, aging, mortality, epidemiology, 1
Isoproterenol, cultured vascular smooth muscle, cultured adventitial fibroblast, aging, cAMP, beta adrenergic receptors, forskolin, 259

Leupeptin, ceroid-lipofuscin, age pigment, protease inhibitor model, rat liver, 213
Life span, Gompertz function, mortality, comparative epidemiology, 25
Life span, growth hormone, aging, immune response, longevity, immunologic theory of aging, 87
Lipid peroxidation, mitochondria, aging, thioctacid, α-lipoic acid, 233
α-lipoic acid, mitochondria, lipid peroxidation, aging, thioctacid, 233

Longevity, growth hormone, life span, aging, immune response, immunologic theory of aging, 87
Lymphocytes, aging, DNA repair, neurons, 283
Lymphocytes, chromosome aberrations, trimethyltin chloride, 125

Mechanical properties, pigeon, rat, bone, tendon, collagen, elastin, 15
Membrane proteins, aging, erythrocytes, oxidation, methionine sulphoxide, thiol groups, 247
Methionine sulphoxide, aging, erythrocytes, membrane proteins, oxidation, thiol groups, 247
Mitochondria, lipid peroxidation, aging, thioctacid, α-lipoic acid, 233
Mitochondrial damage, oxygen free radicals, aging, oxidative stress, 187
Mortality, endotoxin, absorption, elimination, 145
Mortality, Gompertz function, comparative epidemiology, life span, 25
Mortality, ischemic heart disease, coronary artery disease, aging, epidemiology, 1
Mouse, sympathetic ganglion, adrenal medulla, Down's syndrome, trisomy 16, catecholamines, 101
Mouse tissues, intracisternal A-particle, gene expression, retrovirus-like elements, aging, development, 71

Neurons, aging, DNA repair, lymphocytes, 283
Nuclear estrogen receptor, physico-chemical properties, aging (rat uterus), 111

Oxidation, aging, erythrocytes, membrane proteins, methionine sulphoxide, thiol groups, 247
Oxidative stress, oxygen free radicals, aging, mitochondrial damage, 187
Oxygen free radicals, aging, oxidative stress, mitochondrial damage, 187

Physico-chemical properties, nuclear estrogen receptor, aging (rat uterus), 111
Pigeon, rat, bone, tendon, mechanical properties, collagen, elastin, 15
Protease inhibitor model, leupeptin, ceroid-lipofuscin, age pigment, rat liver, 213

Rat, pigeon, bone, tendon, mechanical properties, collagen, elastin, 15
Rat liver, leupeptin, ceroid-lipofuscin, age pigment, protease inhibitor model, 213
Retinoblastoma, anti-oncogene, transcription, human diploid fibroblast, senescence, aging, 63
Retrovirus-like elements, intracisternal A-particle, gene expression, aging, development, mouse tissues, 71
RNA content, gallocyanin, cytophotometric, dorsal lateral geniculate nucleus, 275

Senescence, retinoblastoma, anti-oncogene, transcription, human diploid fibroblast, aging, 63
Sympathetic ganglion, adrenal medulla, Down's syndrome, mouse, trisomy 16, catecholamines, 101

Tendon, pigeon, rat, bone, mechanical properties, collagen, elastin, 15
Thioctacid, mitochondria, lipid peroxidation, aging, α-lipoic acid, 233
Thiol groups, aging, erythrocytes, membrane proteins, oxidation, methionine sulphoxide, 247
Training, detraining, cardiac hypertrophy, adiposity, 49
Transcription, retinoblastoma, anti-oncogene, human diploid fibroblast, senescence, aging, 63
Trimethyltin chloride, chromosome aberrations, lymphocytes, 125
Trisomy 16, sympathetic ganglion, adrenal medulla, Down's syndrome, mouse, catecholamines, 101
